

## Modelers Help Desk

Only one request for help has been received this year, though I do continue to believe it is a valuable service.

One short write up was produced which was intended to be published in each issue of the BB, but it has not been appearing regularly. I plan to do another short write up for BB to further advertise the availability of the service.

The “Help Desk” is simply a member benefit designed to answer questions, indicate resources, and provide modeling and research assistance to 7th Division members, especially newer modelers.

I hope more people will use this resource in the coming months.
